COMMISSION II: INSTRUMENTATION FOR DATA REDUCTION

Working Group II/1: Analytical Instruments
 Arbeitsgruppe II/1: Analytische Instrumente
 Groupe de Travail II/1: Instruments Analytiques

January 31, 1985

Director
 Central Intelligence Agency
 McLean, Virginia 22070

Dear Sir:

At the 1984 Congress of the International Society of Photogrammetry and Remote Sensing in Rio de Janeiro, Mr. Lawrence W. Fritz, National Ocean Service, was elected President of Commission II, and he has asked me to chair Working Group II/1, "Analytical Instruments," with Chet Slama as Secretary. We would be pleased to have a representative from CIA serve on this Working Group.

From recommendations made at the Rio Congress, we have compiled the attached list of tentative objectives. Other objectives are likely to be recommended by new members and added to the list.

A list of tentative business meetings is also attached, and hopefully, there will be other business and technical meetings, some abroad for the benefit of overseas members. We plan to have our membership list completed by March 10, 1985, and a firm schedule of meetings by April 1, 1985.

If you are able to accept this invitation to have a representative join our Working Group, please let Mr. Chester C. Slama (address below) know by March 1, 1985. We will welcome any suggestions you or your representative might have on objectives, meeting dates and locations, and other Working Group II/1 activities.

Sincerely,

Morris L. McKenzie
 Chairman, Working Group II/1

COMMISSION II: INSTRUMENTATION FOR DATA REDUCTION

Working Group II/1: Analytical Instruments
Arbeitsgruppe II/1: Analytische Instrumente
Groupe de Travail II/1: Instruments Analytiques

WORKING GROUP II/1 OBJECTIVES

1984-1988

January 28, 1985

1. Testing Procedures for Analytical Stereoplotters.

A manual of standard procedures for testing accuracy will be prepared to help buyers evaluate the accuracy of analytical stereoplotters being considered for purchase and to help users make periodic accuracy checks of analytical stereoplotters already in service.

2. Review, and if needed, revise and update the "Analytical Plotter Evaluation Guide" and the "Introduction to Analytical Plotter Evaluation Guide."

The "Analytical Plotter Evaluation Guide" and the "Introduction to Analytical Plotter Evaluation Guide" were prepared during the 1976-1980 and 1980-1984 WG II/1 tenures, respectively. They need to be reviewed for possible revision by each succeeding WG II/1 to keep them from becoming obsolete.

3. Standardize input, output, and programs for analytical stereoplotters.

The ability to exchange data and software between analytical stereoplotter users, or even between stereoplotters of a given organization, is limited because of the lack of compatibility between makes and models. A subgroup will be formed to prepare a manual of guidelines for standardizing input, output, and computer programs.

4. Compile a reference manual listing analytical instruments and manufacturers.

This reference manual will be prepared to help the prospective buyer contact manufactures.

5. A handbook will be assembled containing items 1 through 4.

The handbook of reference manuals will be available from ISPRS Commission II President.

**TENTATIVE BUSINESS MEETING DATES
WORKING GROUP II/1 ANALYTICAL INSTRUMENTS
January 28, 1985**

- o March 10-15, 1985, American Congress of Surveying and Mapping-American Society of Photogrammetry Annual Meeting, Washington, D. C.,
- o May 28-31, 1985, Annual Meeting, Canadian Institute of Surveying, Edmonton, Alberta, Canada, (Pending CIS approval.)
- o September 15-20, 1985, American Congress of Surveying and Mapping-American Society of Photogrammetry Fall Meeting, Indianapolis, Indiana,
- o March 16-21, 1986, American Congress of Surveying and Mapping-American Society of Photogrammetry Annual Meeting, Washington, D.C.,
- o May 1986, Meeting of Commission II, possibly Baltimore, Maryland,
- o June 4, 1986, Annual Meeting Canadian Institute of Surveying, Toronto, Ontario, Canada, (Pending CIS approval.)
- o Sept. 28-Oct. 3, 1986, American Congress of Surveying and Mapping-American Society of Photogrammetry Fall Meeting, Anchorage, Alaska,
- o March 1987, American Congress of Surveying and Mapping-American Society of Photogrammetry Annual meeting, Washington, D.C.,
- o June 22-26, 1987, Annual Meeting, Canadian Institute of Surveying, Charlottetown, Prince Edward Island, Canada, (Pending CIS approval.)
- o October 4-9, 1987, American Congress of Surveying and Mapping-American Society of Photogrammetry Fall Meeting, Reno, Nevada,

CHAIRMAN
